

# Dräger X-am<sup>®</sup> 5800 Multi-Gas Detector

The X-am® 5800 multi-gas detector measures up to six gases and is equipped with a shock-resistant CatEx SR sensor. With the Dräger Gas Detection Connect software, it offers live data transmission and powerful fleet management. Designed for personal monitoring, the X-am 5800 offers the highest level of safety at a low cost of ownership.

### Benefits

#### Powerful data analysis in the cloud

Networking capability provides safety and efficiency: Transfer your recorded data directly and conveniently via Bluetooth to a smartphone and the Gas Detection Connect software. As an alternative, you can also transfer the data directly to the cloud with the X-dock test station, providing secure access to your data and its analysis any time and anywhere with access to the internet.

#### **Comfortable Fleet Management**

Manage your fleet of equipment comfortably and efficiently with the X-am 5800. Save operating costs and time with fast tests, using the automatic test station X-dock, with low gas consumption or mechanical bump test station. Further advantages include powerful fleet management via our smart software solution, convenient firmware updates in the X-dock, an optional RFID transponder, and individual color marking of the devices. Sensors are durable and devices remain operational for years, with easy-to-replace spare parts, including the power supply. Dräger provides a 4-year manufacturer's warranty on the basic device, and is compatible with X-am 5800 accessories.

#### **Tailor-Made Gas Monitoring**

The X-am 5800 is small and lightweight, comfortable to wear, and easy-to-use, with large buttons for ease of use while wearing gloves. The display clearly shows important information, such as gas readings, alarms and time. The green D-light indicates that the unit is ready for use, with a simple interface. For added safety, the oxygen channel has four alarm thresholds, real pre-alarms, and main alarms for falling and rising concentrations. The X-am 5800 is approved for use in Ex zone 0, and has been tested according to protection class IP 68.

#### Sensors: Durable and Powerful

The newly-developed CatEx SR sensor calibrates within seconds and protects against shocks, measuring flammable vapors, such as gasoline, diesel, and nonane. The unit can also be set to measure methane, propane, hydrogen, and many other gases. The performance is complemented by Dräger's simple cross calibration concept, in which the measurement gas, calibration gas, and bump test gas can be specified individually. The X-am 5800 calculates the necessary conversations after testing, and the sensor meets the new IEC standard 60079-29-1 (International Electrotechnical Commission) standards.

With decades of experience in sensor technology, Dräger develops and produces the sensors itself, including the powerful and durable electrochemical sensors in the XXS format, resulting in lower operating costs.

## **Benefits**

### Focus on Sustainability

During the development of the X-am 5800, sustainability was priority. The durable Dräger sensors and the rechargeable power supply, which can be easily replaced with one screw, ensure a long service life. Almost all spare parts can be replaced by trained users, with remaining parts repaired by Dräger Service. In addition, the X-am 5800 is compatible with accessories from the previous series. Upon request, a reduced number of instructional manuals will be supplied, saving paper, and recycling of old devices is available.

# System components

### **Dräger Gas Detection Connect**

Dräger Gas Detection Connect is your connection to the digital future of occupational safety. The system connects individual Dräger products through a smart software solution. Thanks to location- and time-independent access, you manage your equipment optimally and always have the position and status of your gas detection equipment and workers available. So you can protect your workforce and increase the efficiency of your plant at the same time.

#### Dräger X-dock® 5300/6300/6600

The Dräger X-dock® series provides you with full control of your portable Dräger gas detection instruments. Automatic bump tests and calibrations with reduced test gas consumption and short testing times save time and money. Comprehensive documentation and evaluations provide you with a clear overview.

### **Dräger Bump Test Station**

Easy to use, stand-alone and portable. With the Bump Test Station, functionality tests of gas detection and warning devices can be carried out easily and quickly.

#### Test gases and accessories

Everything according to regulations: For the safe operation of devices, it is necessary to comply with directives and legal regulations. Regular calibrations and function tests are therefore necessary. Various systems support you in this.

# System components

## Dräger CC-Vision® & Dräger Gas-Vision®

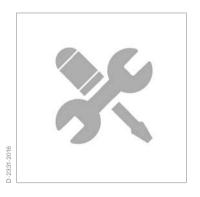

PC software for setting parameters, testing and adjusting and reading out the data logger.

# Accessories

## **Charging set**

Desktop charger for individual or bulk charging of instruments. Worldwide adapters are also available.

#### **Product Service**

Our product service department supports you with a range of service packages – in our shops or on site in your plant. Care, servicing and maintenance are key factors when it comes to safety. Diligent maintenance and care is also absolutely necessary from an economics perspective. Preventive checks, service procedures and original replacement parts make your investment last longer.

#### **Training**

The Dräger Academy has imparted well-founded and practical knowledge for over 40 years. With over 110 authorized trainers and more than 600 available topics, we conduct more than 2,400 training sessions per year. We equip your employees with the knowledge required for real-life situations and ensure that the learned material can be recalled and applied reliably – in their everyday work and especially in stressful situations. To meet your needs, we are also happy to develop a customized training program specifically for you.

#### **Rental Service**

From bridging a temporary shortage of equipment to procuring special equipment for applications involving specific requirements: If you only need to cover a temporary higher demand, then DrägerRental Service with over 65,000 pieces of rental equipment is an economical alternative to purchasing. Fast, straightforward and with a wide range of additional services available upon request.

## Related Products

### Dräger X-am<sup>®</sup> 2800

The X-am 2800 multi-gas detector measures up to four gases and is equipped with a particularly shock-resistant CatEx SR sensor. With the Dräger Gas Detection Connect software, it offers live data transmission and powerful fleet management. Designed for personal monitoring, the X-am 2800 offers you the highest level of safety at a low cost of ownership.

### Dräger X-am® 3500

The Dräger X-am® 3500 was especially designed for clearance measurements. The 1 to 4 gas detector reliably detects flammable gases and vapours as well as O<sub>2</sub>, CO, H<sub>2</sub>S, NO<sub>2</sub> and SO<sub>2</sub>. The innovative signalling design and extensive range of accessories ensure optimum safety and easy handling.

### Dräger X-am® 8000

Clearance measurement was never this easy and convenient: The 1 to 7 gas detector detects toxic and flammable gases as well as vapours and oxygen all at once – either in pump or diffusion mode. Innovative signalling design and handy assistant functions ensure complete safety throughout the process.
