

## Dräger X-plore® 6570 Full Face Mask

The Dräger X-plore® 6570 is the high-comfort silicone full face mask used by professionals in a wide variety of applications. It meets the highest demands of quality, reliability, secure fit, and comfort. This full face mask is the successor to the Panorama Nova masks, a range which has proven itself over decades of use worldwide.

ST-7501-2005

## Benefits

---

### Silicone mask body for safety and wearing comfort

A double sealing frame with threefold sealing edges offers safe protection and a secure fit for almost all face shapes. The mask body is made of durable and eudermic silicone (blue or yellow color), which provides non-compromising wearing comfort—even during prolonged use.

---

### 5-point harness

The comfortable 5-point harness not only ensures easy and quick donning, the wide strap design prevents the development of pressure points on the head.

---

### Large field of vision

The distortion-free lens with 180° wide angle guarantees a large field of view with excellent peripheral vision. The lens is made from impact-proof polycarbonate with either a plastic or stainless steel lens frame available.

---

### Simple servicing and logistics

One universal size simplifies logistics and storage. The inside barcode allows for ease of recording and servicing the mask inventory.

---

### Efficient ventilation system

The efficient ventilation system with separate interior half mask prevents the visor from misting up and guarantees a clear view.

---

### Clear voice communication

An integrated stainless steel voice diaphragm facilitates good communication.

---

### Versatile use

The Dräger X-plore® 6570 is equipped with an Rd40 connection (40mm threaded) for use of the Dräger X-plore® Rd40 filter series.

## Accessories

### Dräger X-plore® Rd40 Filters

Whether used in chemical industry or automobile industry, shipbuilding, metal processing industry, or by public utility services—for decades Dräger respiratory protection filters have been a synonym for experience and safety worldwide. They clean breathable air from contaminants in a low-cost and effective manner.
