Dräger. Technology for Life®

## Benefits

---

### Innovative and comfortable

The Dräger X-plore® bayonet filter series is an innovative line of twin filter respiratory protection products, which combines modern design and enhanced wearer comfort. The off-center arrangement of the bayonet connections enables a wide and unobstructed field of view.

---

### Easy and secure attachment

The filters are equipped with a secure and quick-release bayonet catch, providing easy guidance until they click into place.

---

### Many possibilities

The gas cartridges can be upgraded to operate as combination cartridges, by using various pad attachments or Dräger X-plore® Pure with an adapter. The additional particle filters can be replaced independently from the gas cartridge.

---

### Packaged in pairs

The filters are packaged in pairs, so only the required number of filters have to be opened.

---

### Durable plastic housing

All gas and combination cartridges are equipped with a robust plastic housing.

---

### Supporting cartridge selection

The Dräger VOICE database of hazardous substances offers comprehensive support for selecting cartridges.

---

### NIOSH Approved

All filters and cartridges are NIOSH approved with the full range of half and full face masks.

## Related Products
